

SECURITY OPERATIONS AND FUSION SUBSCRIPTIONS

Choose the Mandiant Advantage Threat Intelligence subscription that meets your current needs.

- Via a global dashboard, access up-to-the-minute actor, malware and vulnerability activity trends.
- Download indicators and export MITRE ATT&CK heat maps for further analysis or enrichment of other tools in your security stack.
- Filter by report types, region, industry, actor, or malware name and access finished intelligence reports with full narrative covering strategic to tactical analysis.
- Get real-time visibility into the threat campaigns that are most active and relevant to your organization.

Your subscription level determines what features and information you have access to, as described in the following table.
